

LUNCH & LEARNS

800-457-2661

- **Commercial Roofing Technologies (RFGTEC) (LU / HSW)**
Learn the basics—including common roof terminology, as well as popular roofing systems, product types and their assemblies.
- **The Single-ply [R]evolution (RFG1plyRev) (LU / HSW)**
Gaining a working knowledge of single-ply systems. Advancing attachments and enhancements for selection, installation and durability. Review impact of environmental codes and standards.
- **Designer Guide to Vegetative Roof Sys. (RFGvegsys) (LU/HSW)**
The rise of vegetative roofing, including market drivers, as well as keys to design and installation.
- **Introduction to Daylighting Systems (RFGdaylgt) (LU/HSW)**
An overview of various daylighting systems, key industry information and the ROI analysis for this type of product.
- **High Performance Roof Systems (HgPerf) (LU/HSW)**
Learn what systems will provide: Superior performance, Extended Life Expectancy, Energy Efficiency and Maximized Life-cycle Cost.
- **Optimized Insulation (OPINSUL) (LU)**
Includes discussion on energy efficiency as it relates to insulation, desirable properties for roof insulation, types of insulation including comparisons and concerns, as well as roof insulation layout and attachment.
- **Architectural Metal Roofing (RFGmtl) (LU/HSW)**
Participants will gain knowledge of the selection criteria required to obtain the appropriate metal roofing system for their specific project. Additional learning objectives will be understanding the metal roofing options and systems that are available.
